Ribbeck Construction Company
Edward "Buzzy" Ribbeck
P. O. Box 5338
Lake Charles, LA 70606

Mr. Ribbeck:

In the summer of 2015 Jefferson Davis Parish Library entered into a contract with your company for a major renovation of a library that is listed on the Historic Register. Selecting a firm that could provide for improvements and updates, maintain the integrity of a building that is one hundred years old and work within considerable time restraints was a daunting task. The Board of Trustees worked hard to insure that the construction company selected would be one of high expertise and effective public relations. We were not disappointed.

I personally watched the entire project of the first floor renovation with eager anticipation and a critical eye. As Director, it was my responsibility to access and report progress or lack of it. The four months were beyond incredible. Each team that Ribbeck Construction sent worked in an experienced and professional manner. One incident in which cypress flooring was a problem was remediated efficiently. All other facets of the project were completed in a timely manner without rushing through the project.

Being an older building did bring forth other questions and needs that had to be addressed. Mr. Buzzy Ribbeck was patient and efficient in dealing with such problems by supplying viable and affordable solutions.

Our building is now modernized, aesthetically inviting, and will certainly serve many more generations. I want to commend all project managers and workers for an extensive renovation that is simply elegant.

Respectfully,

Linda LeBert-Corbello, Director
