RE: Request for Letter of Performance

Buzzy,

I am pleased to respond to your request for this letter. Over the years, we have worked on a number of projects together and I have always been pleased with the outcomes as well as the overall experience of working with your team. While the new construction work has always gone well, I am particularly impressed with your ability to handle complex renovations. Working on projects where the owner desires to continue operations during the work requires an additional amount of attention to detail to keep them running smoothly. While an owner must make some accommodations for the work to be performed, I have never heard one complain about how you handled your work. In particular, your rapid response to the water intrusion caused by severe weather at the JD Bank project in Moss Bluff was particularly impressive. I was a bit surprised that they had zero downtime while the damage was addressed. Not every general contractor would have performed so well.

I wish you continued success with your endeavors and look forward to any future opportunity we may have to work together.

Regards,

Jeff Kudla, AIA
